Freeze, then Creamify™ in minutes

Adjust your freezer's temp

For best results, set your freezer between 9°F and -7°F. The CREAMi® Breeze™ is designed to process bases within this range. (If your freezer temperature is within this range, your CREAMi Breeze Pint should reach the appropriate temperature).

Place the CREAMi Breeze Pint on a level surface

For best results, do not process a base if ingredients have been frozen at an angle or scooped out of and then refrozen unevenly. (If frozen unevenly: melt, whisk, and then re-freeze the ingredients on a level surface).

Upright freezers work best

We recommend not using a chest freezer as they tend to reach extremely cold temperatures.

Freeze for 24 hours

While the CREAMi Breeze Pint may be frozen, it needs to reach an even colder temperature before it can be processed.

Frozen treats on demand

Make the most of your time by prepping several CREAMi Breeze Pints at once. Keep these CREAMi Breeze Pints in your freezer to Creamify on demand whenever the craving strikes. **Register your product and receive a coupon to purchase additional CREAMi Breeze Pints.** Visit qr.ninjakitchen.com/breeze.

Tips for the creamiest results

Pre-frozen ingredients taste sweeter

Worried your base mixture might be too sweet? Don't worry, it won't taste as sweet after you freeze and process it into a frozen treat.

What to do about leftovers

Didn't finish your CREAMi Breeze Pint? Flatten the top of your frozen treat with a spoon or spatula before refreezing. If the treat is hard after re-freezing, process it again on the **program you used to make it**. If it's soft, just scoop and enjoy it.

NOTE: If your treat contains mix-ins, processing again will further crush your mix-ins and create a new flavor.

Making an ice bath

For recipes that require cooking the base, we recommend using an ice bath to quickly cool the base prior to freezing. To prepare an ice bath, fill a large bowl with ice and water. Then place your CREAMi Breeze Pint in the ice water. Once your base has cooled below 40°F, place the CREAMi Breeze Pint in the freezer.

General ingredient substitutes

Dairy-free? Vegan? Low carb? You can still make delicious treats that fit your lifestyle. For the best results, be sure to follow the instructions, carefully measure, and use the tips below when making any substitutions.

Dairy Substitutes

Milk → **Unsweetened** oat milk

Heavy cream → **Unsweetened** coconut cream

Cream cheese → Vegan cream cheese

NOTE: Make sure to use unsweetened substitutes and to whisk coconut cream by itself as the first step.

Sugar Substitute

For recipe specific substitutes, please refer to the recipes in the following pages.

Light corn syrup → Raw agave nectar

NOTE: If using sugar substitutes, use the **LITE ICE CREAM** program to process.

Vanilla Ice Cream with Chocolate Chips

PREP: 5-10 MINUTES | FREEZE TIME: 24 HOURS | PROGRAM TIME: 1½ MINUTES | MAKES: 4 SERVINGS

INGREDIENTS

- 1 tablespoon (½ ounce) cream cheese
- ⅓ cup granulated sugar
- 1 teaspoon vanilla extract
- ¾ cup heavy cream
- 1 cup whole milk
- ¼ cup mini chocolate chips, for mix-in

MAKE IT LITE Use ½ teaspoon stevia and 2 ½ tablespoons raw agave nectar for granulated sugar. Process on the LITE ICE CREAM program.

TOOLS NEEDED

- Large bowl
- Whisk
- Rubber spatula

MAKE IT DAIRY-FREE Use vegan cream cheese for cream cheese, **unsweetened** coconut cream for heavy cream, and **unsweetened** oat milk for whole milk. Whisk the coconut cream until smooth, then add the remaining ingredients.

DIRECTIONS

SCAN & WATCH HOW IT WORKS visit ninjacreami.com.

In a large, microwave-safe bowl, microwave the cream cheese for 10 seconds. Add the sugar and vanilla extract and with a whisk or rubber spatula, combine until the mixture looks like frosting, about 60 seconds.

Slowly mix in the heavy cream and milk until fully combined and sugar is dissolved.

Pour base into an empty CREAMi® Breeze Pint. Place storage lid on pint and freeze for 24 hours.

TIP

Double (or triple) this recipe by simply using two (or three) times the amount of every ingredient. Prepping multiple CREAMi Breeze Pints at once keeps your freezer stocked, so you always have a frozen treat ready to Creamify™ in minutes.

Remove pint from freezer and remove storage lid from pint. Please refer to the quick start guide for assembly and unit interaction information.

Select ICE CREAM.

With a spoon, create a 1 ½-inch wide hole that reaches the bottom of the pint.

Add chocolate chips to the hole in the pint and process again using the MIX-IN program.

When processing is complete, remove ice cream from pint and serve immediately.

TIP

Since the MIX-IN program does not break down harder ingredients, we recommend using mini chocolate chips for the perfectly sized chunks.

Mix-ins 101

Mix in chocolate, nuts, candy, fruit, and more to elevate any treat with bursts of flavor.

Hard mix-ins will remain intact.

Mix-ins like chocolate, candy, and nuts will not be broken down during the MIX-IN program. We recommend using mini chocolate chips and candies or pre-chopped ingredients.

Soft mix-ins will get broken down.

Mix-ins like cereal, cookies, and frozen fruit will end up smaller after the MIX-IN program. We recommend using bigger pieces of soft ingredients.

Customize ice cream & gelato with extracts & mix-ins

1. Make a base

Start by making any base in this inspiration guide, including dairy-free and lite bases.

2. Substitute extract, if desired

To make even more flavors, substitute vanilla extract with 1 teaspoon of fruit, herb, or nut extract.

2. Freeze

Cover with storage lid and freeze for 24 hours.

Keep several prepped pints in your freezer to Creamify™ on demand.

3. Process

Select the program that matches your base:

- ICE CREAM
- GELATO
- LITE ICE CREAM

4. Add mix-ins

With a spoon, create a 1 1/2-inch wide hole that reaches the bottom of the pint. Add your mix-ins to the hole in the pint.

5. Process

Press MIX-IN program.

Don't want to wait? Scoop in some store-bought ice cream into the CREAMi® Breeze Pint and skip to step 4.

FOR ICE CREAMS & GELATO ONLY

We don't recommend fresh fruit, sauces, and spreads as mix-ins.

Adding fresh fruit, fudge, and caramel sauces will water down your treat. Chocolate hazelnut spread and nut butters also do not mix well. We recommend using frozen fruit or chocolate/caramel shell toppings.

Fresh Fruit Sorbet

INGREDIENTS

4 ripe bananas (approx.), peeled, cut in 1/2-inch slices (2 3/4 cups banana)

OR

3 cups ripe pineapple, cut in 1/2-inch pieces

OR

5 oranges (approx.), peeled, cut in 1/2-inch pieces (2 3/4 cups orange)

Using any other fruits except banana, pineapple, and orange for this recipe may damage the unit.

Mix it up

Combine fruits for even more flavor. When combining, mix cut fruit together before adding to the pint for a consistent flavor.

Cut bananas or other fruit into 1/2-inch pieces. It is important to cut the fruit into pieces 1/2 inch or smaller.

Add banana into an empty CREAMi® Breeze Pint to the MAX FILL line.

With the back of a heavy kitchen utensil, such as a ladle or potato masher, firmly press the bananas below the MAX FILL line, compacting them into a homogenous mixture to create space for more bananas.

Continue adding more banana pieces and pressing down with a heavy kitchen utensil until all banana pieces are pressed into the pint just below the MAX FILL line. Place storage lid on pint and freeze for 24 hours.

Remove pint from freezer and remove storage lid from pint. Please use quick start guide for assembly and unit interaction information.

Select SORBET.

When processing is complete, add mix-ins or remove sorbet from pint and serve immediately.

TIP For best results, make sure your fruit is ripe. This will help release the fruit's natural juices making for a sweeter treat and allow the unit to properly process the sorbet.

TIP Make sure to firmly press the fruit into the pint to release the fruit's natural juice. This is an important step when making a sorbet recipe that doesn't include extra liquid. **DO NOT** process loose ingredients.

NOTE: If your freezer is set to a very cold temperature, the sorbet may look crumbly. If this occurs, select RE-SPIN to process the mixture a little more.
